Making pottery on the potter's wheel is called "throwing". The thrower is a very skilful workman. But there is another method of shaping articles out of clay, -- "moulding". A plaster mould is made and the clay is pressed into it. This is a quicker and less difficult way and must be used to make things like handles; but all the most beautiful pottery is thrown. When a piece of pottery is taken off the wheel, it is put aside to dry, after which a design may be painted on it with special colours that will stand great heat; it is then ready to be fired. This is done in a large oven or kiln. The pieces of pottery are placed in earthenware tubs called "Saggers" so that the flames cannot touch the pottery.

- Questions: - (i) What is throwing? (ii) What is the other method of shaping articles?  
(iii) What is the advantage of moulding?  
(iv) How does the potter make designs on the pieces of pottery?  
(v) How is pottery baked in fire?
